

PowerFlow-2

Managed Ruggedized Ethernet Switch with Power over Ethernet

- Compact Industrial and ruggedized Ethernet switches with up to 16 10/100/1000BaseT, and 8x100/1000BaseFX SFPs
- Flexible deployment scenarios using xSTP, ERPS and ultra-fast recovery with PF-Ring and PF-chain
- Advanced L2 functionality like policing and traffic management, as well as security features to assure User Authentication and Device Connection Control
- Variety of input voltage and POE feeding options including POE++
- Certified for EN 50212-4, IEC 61850-3, IEEE 1613 and NEMA TS2*
- Wide Operating Temperature

PowerFlow-2 are managed and unmanaged industrial grade Gigabit Ethernet switches designed to build packet-based operational networks of Critical Infrastructure verticals.

MARKET SEGMENTS AND APPLICATIONS

PowerFlow-2 applications include power utilities, railways, traffic controllers, and safe city applications which require advanced Layer 2 functionality and which in many cases are PoE intensive. Different models of the PowerFlow-2 systems are fully compliant with the requirement of IEC 61850-3 and IEEE 1613 required for power utilities, 50121-4 for railways, and NEMA TS2 for traffic controllers. PowerFlow-2 provide a variety of redundant functions to increase the reliability and deployment flexibility of the communications system, including variety

of Ethernet functions, such as xSTP, G.8032 and ultra-fast recovery using PS-ring and PF-chain unique features. Dual DC inlets and variety of isolated power supply options address a wide range of installation scenarios.

INTEROPERABILITY

PowerFlow-2 is compatible with SecFlow-2 (RSTP, ERPS), Airmux, and PowerFlow-2-10G.

RESILIENCY

Ethernet Ring Protection

PowerFlow-2 supports STP, RSTP, MSTP, ITU-T G.8032 Ethernet Ring Protection Switching (ERPS), and PF-Ring for redundant cabling.

PowerFlow-2 provides five Ring instances, while each can support G.8032, PF-Ring, PF-Chain or Sub-Ring type for flexible uses. (Refer to *Installation and Operation manual* for more details).

PF-Ring can be established for Redundant Ethernet Ring, having recovery time < 10ms with up to 250 units.

MANAGEMENT AND SECURITY

PowerFlow-2 can be managed using user-friendly web interface and CLI with textual data base, and supports SNMPv3 and SSH using IPv4 or IPv6. Advanced L2 Ethernet functions (IGMP, VLAN, QoS) and security features (ACL, 802.1X) provide reliable secure communication.

PowerFlow-2 can be managed centrally and conveniently by RADview's Element Management System or other third-party SNMP managers.
