

Service Assured Access Solutions

Your Benefits:

- Fast roll outs of early 5G deployments with in-field future upgrades to meet new requirements
- CSG for multiple 5G RAN splits and co-located 4G/5G sites
- Highly efficient 4G/5G aggregation: 10G, 25G, 50G, and 100G, timing synchronization
- Fixed-mobile convergence: Co-located mobile and fixed broadband sites
- Multi-CoS Carrier Ethernet/ IP backhaul with service management and OAM-based diagnostics
- 1588 PTP (GM, BC, TC) with integrated GNSS receiver, SYNC-E for timing synchronization
- L2, L3-based fronthaul/backhaul performance monitoring for multiple network slices and for network sharing
- Small form factor to meet space and power supply restrictions

Products Included in this Solution:

ETX-2/ETX-2i
IP and Carrier Ethernet
Cell Site Gateway up to 100G

RADview
Management and Domain
Orchestration
